

Navigate the income jungle

Find your way to more diverse sources of income.

The landscape has changed: finding income isn’t as simple as it used to be.

Bonds are paying again

Australian government bond yields have risen to their highest levels in years.¹

Dividends are lower

ASX 200 dividend yield is **3.6%**, below its 4.4% 20-year average.²

Living costs keep rising

Prices have outpaced wages, squeezing household budgets.³

Why consider multiple paths to income? Don’t rely on a single path.

Diversification

Different income sources can behave differently as markets change.

Regular cash flow

Distributions from a mix of income-producing assets.

Balance risk

If one source dries up, others can help keep you moving.

Easy access

ETFs trade on the ASX like shares: a diversified portfolio in one trade.

Three paths to income

How often it pays* ● Monthly ● Quarterly

01 Dividend income

WHAT IS IT?

Owning shares in established companies that pay out part of their profits.

INCOME FROM

Dividends paid to shareholders by the companies held.

WHAT TO KNOW

Dividends aren’t guaranteed and can be cut. Share prices rise and fall.

ZYAU

Global X S&P/ASX 200 High Dividend ETF

50 high-dividend Australian companies from the ASX 200.

● Quarterly

ZYUS

Global X S&P 500 High Yield Low Volatility ETF

50 high-dividend US companies, screened for lower volatility.

● Quarterly

02 Fixed income

WHAT IS IT?

Lending money to governments, banks or companies by owning their bonds.

INCOME FROM

Regular interest payments from the bond issuer.

WHAT TO KNOW

Bond prices can fall when rates rise. Higher yields usually mean higher risk.

BANK

Global X Australian Bank Credit ETF

Bonds and hybrids issued by Australian banks – not bank shares.

● Monthly

USTB

Global X US Treasury Bond (Currency Hedged) ETF

US government bonds, 1–30 year maturities, hedged to AUD.

● Quarterly

USIG

Global X USD Corporate Bond (Currency Hedged) ETF

Investment-grade (BBB and above) US dollar corporate bonds.

● Quarterly

USHY

Global X USD High Yield Bond (Currency Hedged) ETF

Sub-investment grade bonds: higher income potential, higher risk.

● Quarterly

Did you know? Australian bank bonds currently yield more than Australian bank shares.⁴

03 Enhanced alternative income

WHAT IS IT?

Owning shares and selling ‘call options’ over them – a covered call strategy.

INCOME FROM

Option premiums paid by other investors, in addition to dividends.

WHAT TO KNOW

You give up some capital growth when markets rise strongly, and remain exposed to falls.

AYLD

Global X S&P/ASX 200 Covered Call Complex ETF

Australian shares plus income from selling call options.

● Quarterly

UYLD

Global X S&P 500 Covered Call Complex ETF

US large-cap shares plus income from selling call options.

● Monthly

QYLD

Global X Nasdaq 100 Covered Call Complex ETF

US tech-heavy shares plus income from selling call options.

● Monthly

Considerations for investing

All investments involve risk. An investment in these funds may be affected by risks related to: Covered Call Option Writing, Interest Rates, Credit, Derivatives, Markets, Investment Objective, Index Tracking and Tracking Error, ETF Pricing, Liquidity, Currency, Concentration. The nature and level of risk may vary depending on the fund’s investment strategy and assets. The value of your investment can rise or fall; see the PDS for a full list of risks.
